

Company Profile

FIRE PROTECTION SPECIALISTS

 **WORMALD®**

A distinguished heritage; a bright future – an Australian icon.

Wormald has a long and proud history of delivering specialised fire expertise across Australia. The company, originally known as Wormald Bros, was established in 1889 by brothers Joseph and Henry Wormald as importers and distributor of fire doors and fire sprinklers.

A remarkable success story

Over the next century, Wormald continued to set the national benchmark in all aspects of commercial and industrial fire solutions. We were entrusted with protecting many significant properties including Sydney's iconic Centrepoint Tower, Darling Harbour, and the assets of the Royal Australian Navy.

Wormald returns to its roots

Wormald is now owned by Evergreen Capital LLC and is under new local Australian management. As we progress into the future, the pioneering spirit that propelled Wormald's early success continues to drive us. We will lead the way with front-line technology and cutting-edge research, backed by local expertise and over 130 years of experience, to deliver unrivalled protection to your people and property.

With every innovation and every important breakthrough, we will continue to build on our enduring and inspiring heritage.

Zero Harm

Wormald is committed to its Environmental Health and Safety (EHS) policy and the promotion and support of a culture of Zero Harm to our people and the environment through our work activities.

“

OUR FOUNDERS WOULD MARVEL
AT WHAT WE'VE ACHIEVED IN
130 YEARS. BUT THEY WOULD
ALSO
BE QUICK TO REMIND US THAT
THERE IS ALWAYS MORE TO BE
DONE,
MORE OPPORTUNITIES
TO IMPROVE.”

– Andrew Lee, CEO

For total compliance and total peace of mind.

Wormald's unrivalled fire protection solutions are engineered to deliver. Protection and compliance you can rely on, backed by world-leading technology, over 125 years of unequalled industry expertise and nationwide 24/7 service.

Our experience, expertise and advanced engineering solutions means we are the industry leaders you can trust – protecting life and property since 1889.

We do more than fight fires, we prevent them.

Wormald manages all phases of a fire protection project from concept to completion; covering risk assessment, design, manufacturing, installation and servicing.

We deliver a complete, ready-to-operate turnkey solution, purpose-designed and engineered to meet your site and compliance requirements. Our streamlined installation procedures ensure minimal disruption to your daily operations.

Wormald's highly advanced fire detection and suppression products and systems are developed using worldwide cutting-edge technology to provide the highest level of property protection for every application – from small fire detection systems through to large industrial and multi-building sites.

We are your partner in fire prevention and protection

The effectiveness of every fire safety solution relies on the expertise of the people behind it. Wormald's workforce is among the most highly skilled, long-serving and qualified in the Australian fire safety industry.

INTEGRATED SECURITY:
DEPLOYING THE LATEST
TECHNOLOGY AND ENGINEERING
EXPERTISE FOR ADVANCED RISK
MANAGEMENT TAILORED TO
YOUR BUSINESS NEEDS

Our objective: your peace of mind.

The risk of fire is ever-present, so it's essential that your fire detection systems are regularly serviced to ensure they are ready to perform when needed.

Wormald's skilled service teams maintain a rigorous schedule of testing and maintenance. We also service and test your systems to ensure they meet standards and remain fully compliant with current regulatory requirements.

Ready response

Wormald has one of the largest service networks in the industry, so when the heat is on, you can count on us to be there for you.

- 24/7 service calls, repairs and assistance.
- Fully equipped service technicians are on 24-hour standby, ready to undertake fast emergency repairs or troubleshooting.
- Smart phone technology allows our technicians to access all required equipment and servicing information on the spot.

Simplified real-time tracking and reporting

Wormald provide 24/7, real-time updates on your service calls and test results via our online portal. Log in securely to see what's happening across all your sites, Australia-wide.

- View progress of service calls by site, equipment or status.
- Access inspection results and details.
- Track service schedules.

Our MAG provides unique 24/7 dedicated and personalised service and support, on call 365 days per year.

MAG specialise in solutions for large-scale or complex organisations that operate with multiple locations where comprehensive management is essential and business interruption is simply not an option.

Your first line of defence.

Reliable, well-maintained portable fire equipment is your first line of defence against fire. Immediate deployment can mean the difference between a minor blaze and a devastating full-scale fire.

Wormald supply, test, service and replace portable fire extinguishers, hose reels and fire blankets and offer hands-on training so your staff can operate them with confidence.

We conduct worksite audits to assess your compliance with Australian Standards and identify any deficiencies within your existing portable fire protection equipment on site.

FASTER MAINTENANCE REPORTING WITH X-FIRE

Our service technicians use Wormald's innovative X-Fire application used with smart phone technology to automate the collection and processing of fire equipment testing data and upload directly to your customer portal. This industry-leading technology delivers faster, more accurate reporting and improves system-wide efficiencies.

WORMALD PORTABLE FIRE PROTECTION SOLUTIONS

Portable fire extinguishers and blankets

Fire hose reels and signage

Lay flat fire hoses

Fire hydrants and associated equipment

Decontamination and spill equipment

WORMALD WILL IDENTIFY
AND SUPPLY THE RIGHT
PORTABLE FIRE EQUIPMENT
FOR VARIOUS SITUATIONS
AND CLASSES OF FIRE

Do your staff know how to respond in an emergency?

Give your staff the skills and confidence to make the right decisions and act quickly in the event of a workplace fire with Wormald's fire safety training and emergency training courses.

In order to comply with WHS legislation, employers must provide evacuation training and materials for their employees. Wormald's nationally recognised training solutions will help you meet your legal obligations and promote a safe working environment for employees and tenants.

As a Registered Training Organisation, Wormald's innovative coursework is delivered by certified trainers, and includes practical theory and hands-on learning experiences, underpinned by the latest fire safety regulations.

THE IMPACT OF A CRISIS
CAN BE SUBSTANTIALLY
REDUCED WHEN
PEOPLE ARE TRAINED
TO RESPOND
APPROPRIATELY.

RTO Provider Number 2839.

State-of-the-art and large scale fire solutions.

Wormald has unrivalled, specialist expertise, years of experience plus leading products and systems. We provide intelligent, specialised protection for high risk, production-intensive assets.

Special hazard and high risk solutions

Wormald has developed a range of innovative fire detection and suppression products and systems designed to provide optimum fire protection in challenging and high-risk situations.

We offer special hazards solutions that will fight fire without damaging sensitive electronics and high value or mission critical assets, such as computer rooms, operating theatres, data recovery centres, museums, libraries and switch rooms. Our specialist protection strategies curtail water damage and include pre-action, water spray and mist, as well as gas suppression, including SAPPHIRE® Fire Suppression Systems, Inergen® Gaseous Systems, Rotarex Inerex® Inert Gas Fire Suppression Systems and FireDETEC® systems.

Wormald employs the latest fire protection technology and methods for high-risk areas where staff and assets are highly vulnerable to fire events, e.g. light and heavy vehicles, commercial kitchens, data centres, loading docks, and areas where combustible liquids are stored.

Marine fire protection

Wormald Technology specialises in supplying and servicing the marine industry. We have extensive experience in the design, supply, installation and commissioning of marine, naval and military fire protection, detection, safety and security systems. As marine specialists with numerous fire protection system installations, we can offer many services including:

- Specialised fire protection systems
- Commercial and MIL-SPEC gas detection systems
- Commercial and MIL-SPEC fire detection systems
- Project management needs
- Maintenance and support
- Lloyd's Register (LR) approved service supplier

SPECIALISED SERVICES

Technology

INNOVATION

SELECT

RAPID AND ON-TIME SERVICE DELIVERY

Wormald Select, the latest armament in our service delivery suite is an in-vehicle location services technology. Our trained dispatchers are able to select the most geographically advantaged service technician to rapidly respond to your emergency service requests.

- Wormald Select immediately identifies the fastest response vehicle
- Provides real time site arrival information
- Graphically shows and dispatches available technicians who are able to rapidly respond to your emergency call outs
- Smart Google Maps system integration
- Installed in 700+ service vehicles

INSPECT

DIGITISING YOUR EQUIPMENT'S TESTING RECORDS

Wormald Inspect is our latest technician digital toolkit that simplifies your fire systems compliance records and data management by electronically capturing test data.

Wormald Inspect provides:

- A digitised record of the test
- A digital timestamp for added compliance accountability
- Customer specific site access requirements
- Key customer details

PROTECT

DIGITISING YOUR EQUIPMENT'S SERVICE RECORDS

Wormald Protect is our purpose built electronic service toolkit for dispatch and management of your emergency service call outs.

Technicians are instantaneously notified on their smart device with information such as, call details, fault notes, key site contacts as well as Google Maps integration that provides turn by turn directions to your door.

- Captures fire systems service and repair data in real time
- Electronic docket capture technology
- Digital timekeeping - log on/log off
- Provides a seamless flow of service and historical data

COLLECT DOCKET CAPTURE TECHNOLOGY

Wormald Collect is a new feature of Wormald Inspect and Wormald Protect that allows our technicians to electronically capture an image of the service/ test docket for compliance and archival purposes. Docket capture is not just limited to service records it can also be used to collect critical site safety forms of regulatory documentation that requires archiving.
